(10%) of the borrower's previous calendar year's outside plant total construction, whichever is greater.

(2) For central office equipment, the limit is \$400,000.

(3) For special equipment, the limit is \$200,000.

(4) For buildings, the limit is \$200,000.

(c) A single minor construction project may be a discrete element of a somewhat larger overall project, such as the provision and installation of a standby power generator or heating/air conditioning equipment in connection with a building modification or expansion project or the splicing on a major cable placement project. It cannot be a portion, by dividing into smaller segments, of a discrete major construction project, such as the placement of a continuous cable facility.

(d) RUS approval must be obtained in advance for minor construction unless all of the following conditions are met:

(1) RUS has approved the engineering design.

(2) All standard RUS procedures are followed, including use of new materials listed in the List of Materials for Use on Telephone Systems of RUS Borrowers (Bul. 344-2) and the application of RUS construction practices. (See § 1753.6)

(3) The Standard Form 773 contract is used without modification.

(e) The borrower shall determine the scope of each proposed construction project and decide how it will be constructed. A work project number shall be assigned to which all charges for that project are referenced.

(f) The borrower shall maintain accounting and plant records sufficient to document the cost and location of all construction and to support loan fund advances and disbursements.

(g) Normally the borrower will finance minor construction with general funds and obtain reimbursement with loan funds when construction is completed and executed Form 771 has been submitted to RUS. If a borrower satisfies RUS of its inability to finance the construction temporarily with general funds, RUS may establish, on a case by case basis, a work order fund for specific construction projects. The work order fund will be closed upon receipt of an FRS and the executed Forms 771

for the specific projects for which the work order fund was established.

(h) RUS will advance funds to finance minor construction work projects only if all necessary documents, including an FRS and supporting data covering the project, are received within one year of the date construction of the project is completed.

§ 1753.81 Inspection and certification.

(a) Upon completion and prior to closeout, minor construction must be inspected and certified to be in compliance with RUS construction standards, to be reasonable in cost, and to meet applicable codes. The certification is made by an experienced telephone engineer who is either licensed in the state where the inspection will be performed, or is a borrower's staff engineer, who meets the requirements of the "employee in charge" of force account engineering as described in subpart B of this part. The GFR will periodically audit the inspection of minor construction to ensure integrity of the procedure. RUS borrowers with less than 2000 subscribers may use the above procedure or have construction inspection performed by the GFR.

(b) Engineering services for minor construction may be contracted using RUS Form 245, Engineering Service Contract—Special Services. Costs for these services may be included in the costs for construction on the Form 771. (See subpart B of this part.)

(c) Upon completion of construction, the borrower shall obtain the engineer's certification on RUS Form 771. An official of the borrower, designated by the board of directors, shall also execute the borrower's certification on Form 771.

§ 1753.82 Minor construction closeout.

(a) For minor construction inspected by the borrower's engineer, an original and two copies of Form 771 shall be sent to the GFR. The GFR will initial and return the original and one copy.
